

Demon Alarm

Products » Alarm Immobilisers » Demon Alarm

The Datatool Demon is quite simply the best compact self-fit system you can buy for your bike. Designed with market leading features, the Demon is one of the highest specification budget systems available and can be easily installed on any 12v motorcycle, ATV or special.

High Powered Siren –

With full 8 cycle and metal nose cone for added protection in the event on an attack

Waterproof Design –

The system is fully potted to eliminate water ingress and improves attack resistance

Glove Friendly Remote –

Simple two button remote for ease of use

Ultra Low Current Draw –

Class leading ultra low current draw to help save your bikes battery during winter or long periods of inactivity

Compact Alarm Unit –

With its small unique size and shape the Demon is designed to fit in even the most awkward of spaces

Simple Add New Remote Feature –

Easy to add replacement remotes even if one has been lost or stolen

Activation Notification –

A loud beep on disarm notifies the owner on disarming if the system has been activated in their absence

Failsafe Movement Sensor –

With proven technology helping eliminate false triggers

Simple 2 Wire Installation & Plug-In LED –

With ring terminals already connected this ensures the Demon can be easily installed to any 12v Motorcycle, Scooter, ATV or Special

Support
